

Pressing deadlines of today's society can sometimes cause us to step into dangerous situations without considering the risks. Crossing a busy road or intersection without due care or stepping into busy traffic whilst rushing to an appointment.

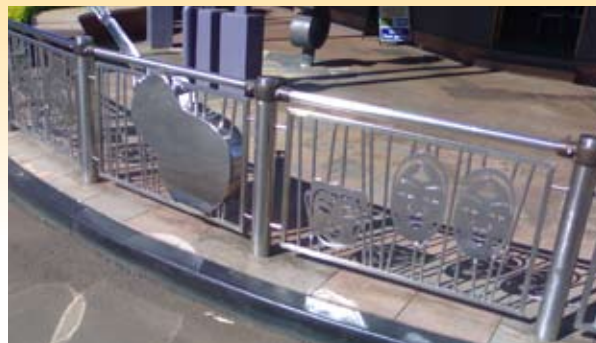

Custom designed and manufactured, modular Stainless Steel fencing to suit urban location. Designs include Lockable/Removable fencing and mobile fencing.

Fencing is the most practical method of guiding busy people safely, especially when crossing roads, boarding trains, buses or taxis on our increasingly busy streets.

The new, simple stainless steel solution.

SPEED HUMPS AUSTRALIA

Stainless Steel Modular Pedestrian Control Fencing is used extensively in highly populated urban areas throughout Australia.

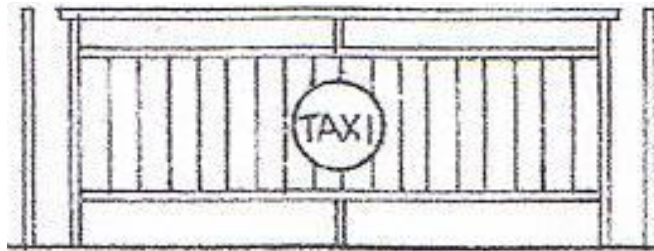

Suggested uses and locations:

- Busy intersections and street corners
- Pedestrian crossings
- Taxi Ranks, Bus Stops and Railway Stations
- Hospitals, care facilities and disabled units
- Shop Interiors, escalators and travelators
- Car Parking Stations
- Pedestrian refuges
- To control Jay Walking

Modular Stainless Steel Pedestrian Control Fencing

DESIGNED FOR SAFETY

Previously the cost of site specific designed and manufactured fencing was prohibitive both in cost and time. Councils, Engineers and Designers now have options of MODULAR Stainless Steel P.C.F ready made and in stock, significantly reducing the time, the cost, the supply and installation for critical locations throughout our urban environment.

Product Features and Benefits:

- Modular
- Surface mounted or inground mounted
- Lightweight
- Quality Maintenance Free Stainless Steel Product
- Ready made and in stock
- Simple Quick Installation
- Cost Effective
- Lockable/Removable Designs
- Mobile Designs

As a modular product, these fence panels will be held in stock, which will simplify and expediate installation and make this product more cost and time effective compared to site specific designs.

Pedestrian Crossing and Refuges
